## Professional License Verification and Monitoring

**All State Boards. All Taxonomies. All U.S. Jurisdictions.**

### CONTINUOUS LICENSE MONITORING WITH NOTIFICATIONS

Verisys actively “pulls” data from all State Boards and primary sources. Verisys tracks licensing regulations and requirements across all U.S. states, territories, and jurisdictions. Verisys identifies and provides verified, accurate, and up-to-date license data on all state-regulated licenses and all state board certifications for a given licensed practitioner.

#### PROFESSIONAL LICENSE VERIFICATION:

- Provides a point-in-time verification of a professional license number, including status, issue and expiration date, primary source information, and any disciplinary action (current or historical)
- Searches aliases provided on each practitioner as part of the search criteria and verification process
- Verified licenses will include unaltered data from the primary source for each licensed practitioner
- All possible findings are fully vetted and verified to ensure accuracy requirements are met

#### PROFESSIONAL LICENSE MONITORING:

- Professional license monitoring looks for changes in license status over the course of time for each practitioner
- All licenses identified and verified during the Professional License Verification process can be monitored as often as daily for a change in license status published by the primary sources
- License monitoring includes both active expiration tracking based on primary source expiration date and renewal verification
- With the CheckMedic platform, notifications are sent upon verification of any change in license status, notice of expiration dates, and notice of any new sanctions or disciplinary actions for any identified and verified licenses

#### LICENSE VERIFICATION INCLUDES

##### Verify the Current Status of the License:

- Active
- Pending
- Temporary
- Inactive
- Impaired
- Restricted
- Suspended
- Probation
- Revoked
- Not Found
- Not Regulated
- Superseded

Identify Current  
and/or Historical  
Disciplinary Actions

Monitor Expiration Date  
and provide Notification  
in advance of expiration
