Transform data with Provider Data and Directory Solutions

Maintaining compliant provider directories is a snap with our five-day-a-week updates. Verisys masters multiple customers source datasets, which could be inaccurate and incomplete, into a comprehensive and relevant consumer friendly mission critical application.

Accurate provider directories ensure members find the right provider, perform their research across multiple filters including; provider quality, practice service locations, specialties, carrier preferred ratings, and other key indicators. Our solution is member-centric that can be delivered as a data set extract, our internal platform, or even as a data enrichment combining Verisys data and cleaning internal data.

Provider Data and Directory Solutions

Problem:

While health plan member portals generate significant member traffic, they may lack the best provider directory information for their consumers' growing demand for deeper, more meaningful information that helps them make better healthcare decisions. Meeting that demand means offering a member experience, with the appropriate information, as sharp and sophisticated as the consumers who use it. Maintaining a network directory takes a technology platform, operational and implementation expertise and experience.

Value:

Verisys' provider directory management solutions transform often-flawed provider data into comprehensive, highly configurable directories that integrate seamlessly with your member portal. We configure the data which is often nested by network provider, provider location, provider speciality and prover plans, provider tiers so the Carrier's digital team can meet their user experience goals. This includes; displaying intricate networks the way you want your members to see them, highlighting and tiering network providers that is personalized just for them — including telemedicine providers.

Credential. Search. Transform. Verify. Verisys.

Provider Data
and Directory Solutions

✓✓Verisys®

By offering a more comprehensive, integrated provider search platform, you can keep current members satisfied and engaged while attracting new customers. Moreover, by delivering relevant, actionable information, consumers can make informed decisions that can lead to better outcomes—one of healthcare reform's primary goals.

Our flexible approach meets all market needs. Whether it's providing an extract, a complete portal, or doing a data clean-up, Verisys will work with clients to ensure requirements are met. Here's what our clients like about the solution:

- Integrated offering with implementation, operations and technology platform
- Over twenty years of experience and expertise
