

Issue Badges
inside Canvas

BadgeSafe™

Why use BadgeSafe™?

Curating credentials in our centralized repository means they can be verified and endorsed even if the issuing system, service or organization ceases to exist.

BadgeSafe™ For Canvas

- First fully integrated badge system
- Currently issue badges by:
 - Assignment
 - Course
- Independent Views for Teacher and Student
- Learning Tools Interoperability (LTI)™ & Canvas API driven
- Mozilla Backpack Export
- Free Displayer Application – “Open Badges”

Accreditrust Differentiation

- Badges can be securely exchanged among many stakeholders
- Facilitates multi-party endorsements
- Hosted criteria landing pages
- “Carrier Class” Infrastructure

ISSUE CREDENTIALS WITH BADGESAFE™ FOR CANVAS

GET STARTED

"BadgeSafe™ for Canvas" is a badge issuing application developed with Canvas APIs. Badges are maintained within the Canvas U/I. Users may export their badges to a TrueCred™ Folio or Mozilla Backpack.

Accreditrust developed BadgeSafe™ for Canvas for users of Canvas from Instructure. Course designers and instructors have a user-friendly methodology for adding badges to a course's assessment system. As an installed LTI application, BadgeSafe is accessed through a menu item in Canvas.

HOW TO GET STARTED

The process to request a Key and Secret requires you to create an account on our website. Please register with your organization provided email address. **We will NOT approve accounts with email addresses from free email domains (i.e. gmail.com, yahoo.com, aol.com, mac.com)** Once your account is approved, use the "Get Started" button above, login, and fill out the request form presented. Make sure to check off "Requesting BadgeSafe Key and Secret."

1. Request Secret KEY **BadgeSafe™ Beta 2 for Canvas Secret Key Request Form**
2. Enter Consumer Key and Secret, which will be emailed to your registered email account
3. Enable BadgeSafe at the course level navigation

Canvas Open Source users are required to supply their own API Key. Only Canvas builds newer than Aug 2013 are supported.
